

## Loss of Control

According to the FAA and NTSB, Loss of Control is the #1 killer in GA. This seminar will cover the most common errors made by pilots with respect to Loss of Control. Cross-control stalls, accelerated stalls, and elevator trim stalls will be discussed. Close in approaches in low visibility conditions, especially at night, are a major problem. Remember airspeed is your best friend. We plan to cover it all and help keep you safe in your flying machine, whatever it may be.

**Directions:** I-84 Exit 62 join Cascade Ave to first traffic light. RT on 13th St. Join 12th St and then Tucker Rd. Museum is 1.5 miles south on left side of Tucker Rd. Museum doors locked at 6:30pm.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
